

Redesign the Misleading Colored Chart

R.No: 28 Reg. No: 192424112 Name: ROHAN P T

Each chart below uses color in a misleading or confusing way. For each one, answer the three questions in your own words.

Chart 1

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Chart 2

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Data Handling and Visualization

Redesign Misleading color chart

Chart - I:

1. the chart shows me the monthly revenue in lakh. it compares the amount of revenue earned in different month and helps us see which month had higher or lower revenue.
2. the colors are too bright and inconsistent, and the different colors can make the bars look like they represent different categories rather than different month
3. use one consistent color for all month, with a darker shade to highlight a particular month if needed.

Chart - II

1. It shows customer satisfaction rating (Poor, Fair, Good, Excellent) and the number of responses for each rating
2. the colors are too contrasting and distracting. the bright yellow and orange, in particular, draw attention away from the actual data

8. use a single sequential color scale, such as light to dark blue from poor $\rightarrow$ fair $\rightarrow$ good $\rightarrow$ excellent so the colors communicate the progression of satisfaction

interactively the grid will show

from the grid will show

Chart - 1

The chart shows the monthly revenue in lakhs. It compares the amount of revenue earned in different months and helps us see which month had higher or lower revenue.

9. The colors are the bright and inconsistent, and the different colors can make the data look like that represent different categories rather than different

10. Use one consistent color for all months, with a darker shade to highlight a particular month if needed.

Chart - 2

It shows customer satisfaction rating (poor, fair, good, excellent) and the number of responses for each rating.

11. The colors are too contrasting and distracting. The bright yellow and orange, in particular, draw attention away from the data.
